

Architectural + Project Ceramics

Delivery Program 2010/2011

WT. 1.35 m

interbau  **blink**
architekturkeramik made in germany

Architectural and proje

Architectural and project ceramics

In large space...

...or in detail, with special tiles

Interbau-Blink tiles, no matter if split tiles or stoneware tiles, will set characteristic accents in modern architecture. Different colours will enable an attractive harmony or contrasts. Buildings will become attractive eye catchers. Façades and walls will achieve remaining beauty. Long durability, colour and light fastness will save the owner costs for regular repairs. In industrial and trade areas like food industry or or chemical industry, Interbau-Blink tiles are

preferred for floor and wall cladding, as they fulfil all requirements for hygiene and are exceptionally easy to maintain.

The material is often set to resist high stress. Interbau-Blink products are resistant against frost, heat and aggressive substances.

Our high quality standard is based on the over 100 years of experience, qualified employees and modern production engineering.

The special program for industrial and acid resistant construction is shown in a separate catalogue.
