## SQUARELINE / DURONDELL NEW COLOURS

**Opening the door to fresh new profile ideas –**  
the sophisticated shimmer of aluminium, inspiring colours that are refreshingly modern: The additional new colours in the SQUARELINE and DURONDELL profile collections. With “crimson”, a delicate lilac

shade has been added to the pallet, which is subtly highlighted depending on how the light falls. “Mercury” presents a truly up-to-date grey, which has a shine like polished steel. Both new profile colours are available in a brushed or high gloss anodised version.

Tile edging profiles

## SQUARELINE / DURONDELL / DURAPLUS NEW COLOURS

**Lustrous metals are back in the spotlight** – refined metals are also a highly popular material in interior design. An elegant appearance is achieved in an instant. Choose from three different colours, copper anodised, matt black anodised and smoked chrome. The warm copper brings an almost romantic atmos-

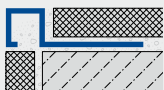

phere, recreating the glamour of a bygone era. Matt black and smoked chrome create an optical impression of technical modernity. Copper and black matt are available in the SQUARELINE and DURONDELL profile designs. The DURAPLUS profile design is available in a smoked chrome brass version.

Tile edging profiles

## SQUARELINE / DURONDELL NEW SURFACES

**A very special kind of inspiration** – both the SQUARELINE square trim profile and the DURONDELL round-edged versions offer exciting design ideas for living areas and bathrooms. Now available with tactile surface finishes.

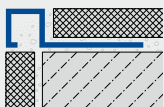

Powder coatings lend the aluminium profile finishes new visual and tactile qualities. The colours beige, brown and anthracite are the current trends. Durable and easy to care for, the decorative finishes are setting new accents which are here to stay.

Skirting

## CONSTRUCT *Square* NEW DESIGN

**Elegant and discrete but nevertheless decorative** – made from premium quality aluminium and available in two different colours – this is the new CONSTRUCT *Square* skirting strip from DURAL. Silver anodised or white powder-coated, this skirting fits harmoniously in the bright architecture of modern interior design.

At just 60 mm high, it produces discrete transitions between flooring surfaces and wall designs and an internal cavity of 10 mm offers ample space for all cable types. Internal / external corners and end caps are created by a versatile accessory piece, making it possible to master any interior layout using only two system components.

Shower board systems

## TI-BOARD

## NEW DESIGN • NEW SURFACE

**The lightweight solution** – Weighing in at only 23 kg for the 90 x 90 cm version and 28 kg for the 90 x 120 cm version, this new development is a real light-weight – as well as extremely easy to install!

Available in white, grey or anthracite, TI-BOARD fits harmoniously in any bathroom. Even floor-level, barrier-free installation is simple using the new TI-BOARD from DURAL.

The new complete range for shower boards is manufactured from a composite material that combines natural stone and synthetic resin which is fully permeated with colour.

Its appearance is as high quality as its practical use.

Sturdy and durable, completely water-tight and easy to keep clean, it fulfils the most stringent requirements.

The stylish surface structure of TI-BOARD also prevents slipping whilst showering. The integrated slope and a powerful drain, connected securely to the shower floor, allow the shower water to drain away quickly and completely.

The right-angled edges fit precisely to the walls and floors. Even installation of a shower partition or screen is simple thanks to the flat, load-bearing borders.
